

DFD – Data Flow Diagram (Levels 0, 1, and 2)

Description:

The Data Flow Diagrams illustrate how data moves through the system at different levels of detail. Level 0 presents the system as a single process, Level 1 decomposes it into main functional processes, and Level 2 provides a detailed view of internal operations and data stores.

Entity Relationship Diagram

Description:

This diagram illustrates the database structure of the Laundry Service System, showing the main entities, their attributes, and the relationships between them. It ensures data integrity by defining primary and foreign keys and preventing data duplication through proper normalization.

General Flowchart

Description:

This flowchart represents the overall system workflow from user interaction to order completion. It shows the sequence of actions, decision points, and system responses to ensure a logical and consistent process.

Use Case Diagram

Description:

This diagram describes the system functionality from the user's perspective. It identifies the interactions between actors (Guest, Customer, and Admin) and the system, highlighting the main use cases and system responsibilities.
